

Your AM Solution

The sophisticated ecosystem
for metal 3d printing

We invent. You succeed.

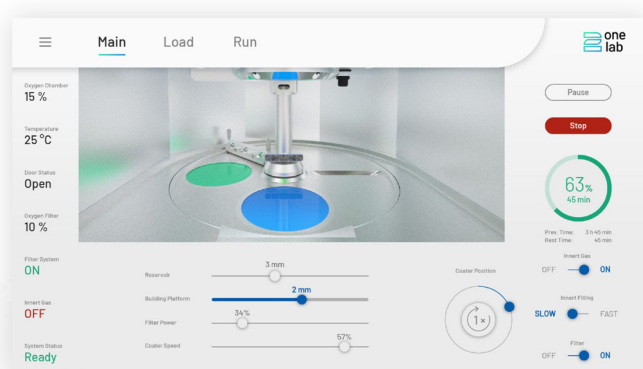

CREATE

A compact
3D metal printer
designed to produce complex parts

2Create user interface

Fast material change

Change your powder within 20 minutes

Plug & Play

Ready to start printing titanium & other alloys

Instant printing

Ready to print in below 5 minutes (from 21% oxygen to below 1%)

Extrem low running costs

Low energy consumption, long life and affordable filters, low maintenance concept

General		Optic	
Build volume	Ø 100 mm x 100 mm	Laser source / power	Yb fiberlaser / 250W
Reservoir volume	Ø 110 mm x 200 mm	Wavelength	1070nm
Coater	Rotation precision coater	Lens	Precision F-Theta lens
Inert gas	Nitrogen / Argon	Scan speed	up to 10 m/s
Layer thickness	20 - 100 µm	Spot size	min. 40 µm
Dimensions	720 x 860 x 1790 mm	Electronic	
Weight	450 kg	Power	230V, 10A 50/60Hz, 2.3kW

BUILD

An innovative
CAM software
developed for smart automation
and optimization of your printing
results

Nesting

High-speed nesting saves valuable post-processing time

Labeling

Advanced labeling for easy identification of parts

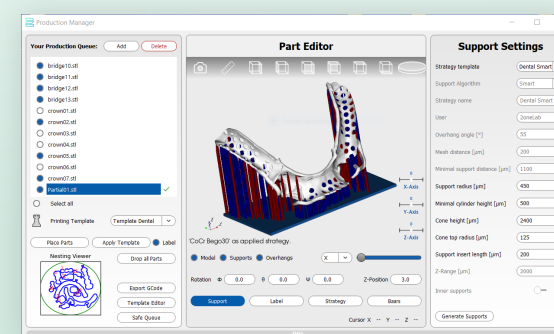

Support generation

Sophisticated, fully automated support generation

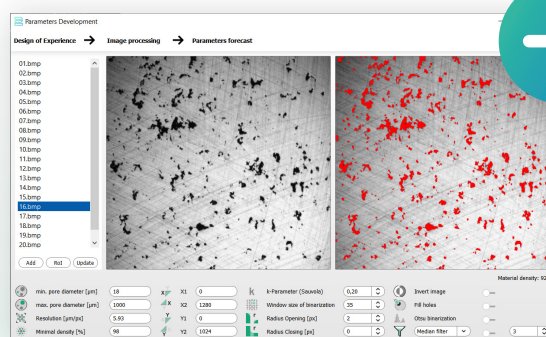

Production manager

Boost your productivity & workflow optimization

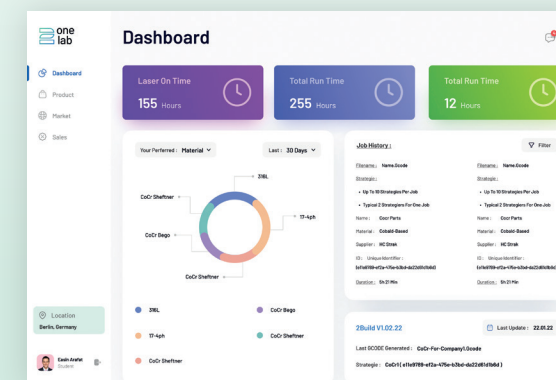

Integrated analytic tool

- + Quickly develop new parameters
- + Automatic design of experiments
- + Integrated density evaluation with image analysis
- + Automatic calculation of optimal printing parameters

2Connect

Control and monitor your AM ecosystem on one platform

Applications

Your challenge. Our solution.

2Create is an industry-leading 3D metal printer designed specifically for small and medium-sized parts. Whether you need to make implants, industrial parts or just for the flexibility of research and development, the **2Create** can handle the job in a cost-effective, efficient, and high-quality way. With an open concept design, this 3D printer is compatible with powders from other manufacturers giving you the freedom to make a wide variety of parts without having to spend extra money.

80 crowns in CoCr in 4.30 h

Heat conductor in aluminium,
built in 4.10 h

1 ring in 316L, built in 2.30 h

3 abutments in CoCr built in 3.20 h
Post processing: connectors milling

Learn from the AM experts

At 2oneLab, we are passionate about Additive Manufacturing and the ability to create. A group of passionate minds came together to reduce complexity in 3D printing and make it accessible to everyone.
